

NOVA AI: Empowering Education Through Intelligent Feedback

Discover how NOVA AI revolutionises learning by connecting teachers, parents, and advanced AI to support student growth.

Made with GAMMA

Teacher User Stories

NOVA AI streamlines the teacher's workflow, providing tools to monitor student progress and facilitate communication with parents.

Class & Student Access

As a teacher, I want to select my class and view the student list, so that I can access their exam records.

Exam Paper Upload

As a teacher, I want to upload the student's exam paper, so that we can receive AI-generated feedback.

Exam Result Entry

As a teacher, I want to enter each student's exam results, so that I can track their performance.

AI Analysis to Parents

As a teacher, I want to send AI analysis to the parent, because parents should know their child's learning gaps.

Parent User Stories

NOVA AI empowers parents with insights into their child's academic journey, fostering effective support and collaboration with teachers.

Course List View

As a parent, I want to view my child's course list, so I can see what subjects they are taking.

Exam Results Access

As a parent, I want to access Exam 1 and Exam 2 results, so I can understand their academic progress.

AI Feedback Review

As a parent, I want to read the AI-generated feedback, so I know how to support my child's development effectively.

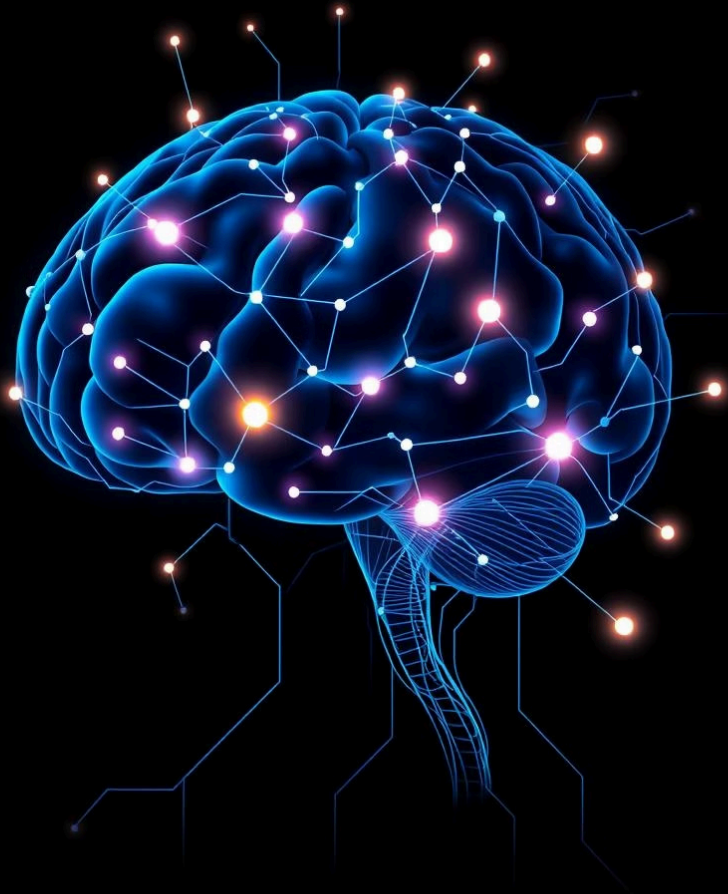

Teacher Communication

As a parent, I want to send a message to the teacher, so I can share what actions I've taken to help at home.

AI Engine User Stories

The NOVA AI engine is the core of the platform, providing intelligent analysis and personalised suggestions to enhance learning outcomes.

Mistake Identification

As the AI engine, I want to analyse the student's exam paper and identify mistakes, so I can determine the topics they struggle with.

Personalised Suggestions

As the AI engine, I want to provide suggestions based on the student's intelligence type, so parents receive personalised and effective guidance.

Foundation for Development

These user stories serve as the foundation for designing and developing the key features of the NOVA AI platform, ensuring a user-centric approach to educational technology.
